Data Visualization with Power BI and Tableau

TABLEAU DASHBOARD PROJECT

UrbanCart – Retail Sales & Profitability Dashboard

Student Name	Radhika Mali
Roll No.	T017
Class / Batch	TYIT
Subject	Data Visualization with Power BI and Tableau
Academic Year	2025-2026

Submitted to: Sumit Kumar Tripathi

1. Project Title

UrbanCart – Retail Sales & Profitability Dashboard using Tableau

2. Objective

The main objective of this project is to create an interactive dashboard using Tableau for analyzing retail sales and profitability. The dashboard helps users understand sales trends, profit ratio, regional sales, state-wise sales, category-wise sales, customer sales, discount impact, and customer segmentation using interactive visualizations and filters.

3. Project Description

This project uses Tableau to develop an interactive Retail Sales & Profitability Dashboard using the UrbanCart sales dataset. The dashboard contains a Profit Ratio, Monthly Sales Trend, Region-wise Sales Analysis, Top Customers by Sales, Customer Segmentation, Discount vs Profit Analysis, State-wise Sales Map, Sales by Category, and interactive filters. Users can filter the dashboard based on Category and Region to analyze the data according to their requirements.

4. Dataset Details

Parameter	Details
Dataset Name	UrbanCart_Sales.csv
Source	Fictional/Sample Dataset created for academic project
Number of Records	800
Important Fields	Order ID, Order Date, Customer, Region, State, City, Category, Product, Quantity, Sales, Cost, Profit, Discount

5. Tools & Technologies Used

- Tableau Desktop
- CSV Dataset
- Data Visualization and Dashboarding

6. Tableau Worksheets / Charts

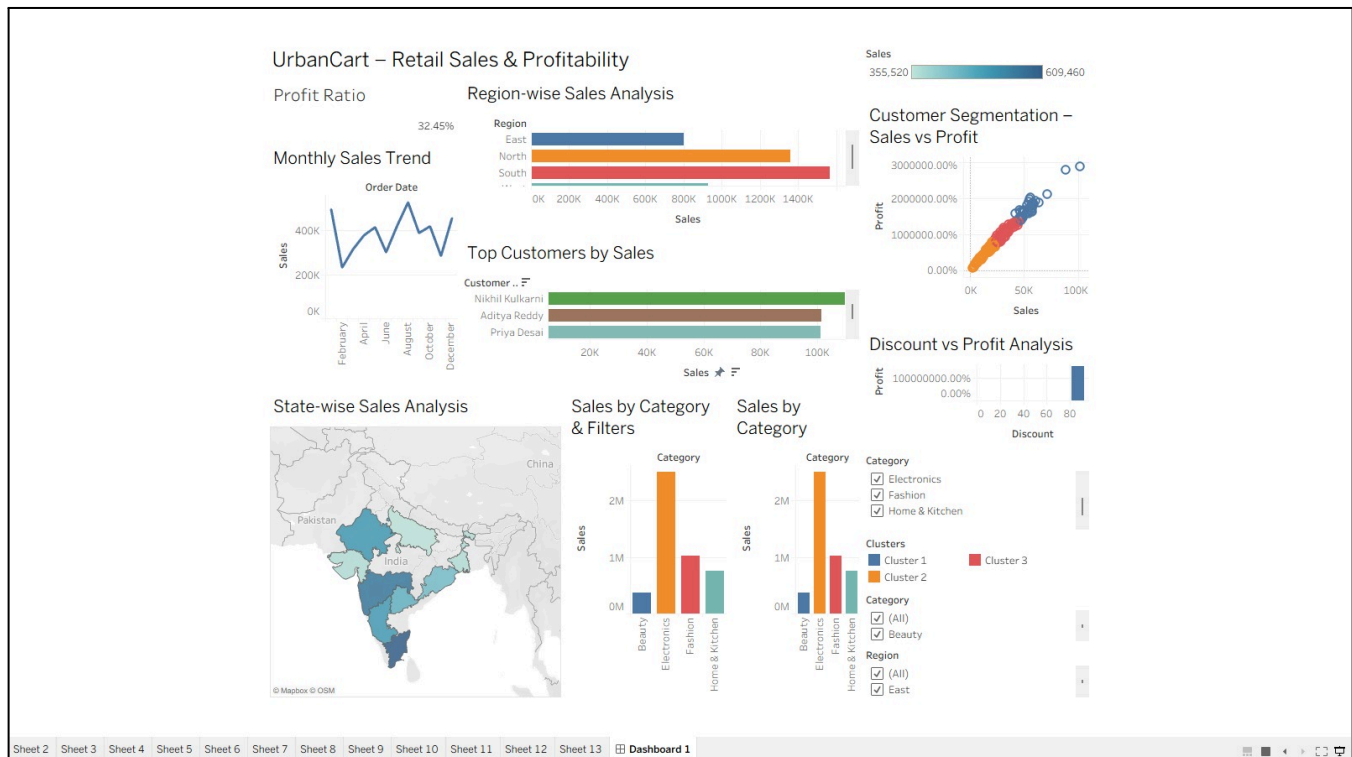

Visualization	Purpose
Profit Ratio	Shows profit percentage
Monthly Sales Trend	Shows monthly sales
Region-wise Sales	Compares regional sales
Top Customers	Shows high-sales customers
Customer Segmentation	Groups customers
Discount vs Profit	Shows discount impact
State-wise Map	Shows state sales
Sales by Category	Compares categories
Interactive Filters	Filters by Region & Category

7. Calculated Fields

The following calculated fields can be used in the Tableau dashboard:

Profit Ratio = $\text{SUM}([\text{Profit}]) / \text{SUM}([\text{Sales}])$

8. Dashboard Screenshot

9. Key Insights

1. **Profit Ratio** shows the percentage of profit generated from total sales.
2. **Monthly Sales Trend** shows changes in sales over different months.
3. **Region-wise Sales** helps compare sales performance across regions.
4. **State-wise Sales Map** shows sales performance across different states.
5. **Customer Segmentation** groups customers based on their sales and profit.

10. Video Demonstration

Video Link: <https://youtu.be/cfLvPUvhBoM>

The demonstration video explains the dataset, Tableau worksheets, dashboard design, filters, calculated fields, and major observations.

11. GitHub Repository
